

FEATURES

BENEFITS

High-Quality Protein Sources

SOYBEAN MEAL
PROTEIN PELLETS

Needed for building body tissue, skin, hair, muscle, nervous system

High-Quality Energy Sources

BARLEY, MILO, CORN,
HYDROLYZED ANIMAL
AND VEGETABLE FAT

Energy is fuel for the body for work, growth, milk production

Nutritionally Balanced Vitamins & Minerals

Needed for metabolism, skeleton formation, nerves, body fluid regulation and enzymes. Calcium and phosphorus balanced when fed with alfalfa hay

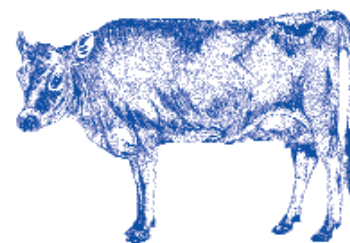

Chelated Trace Minerals

Minerals attached to proteins making them more bioavailable for the animal, increased absorption at the level of the small intestines

**16%
DAIRY FEED**

614

ACE HI 16% DAIRY FEED is formulated with rolled grains, protein pellets, added vitamins and chelated trace minerals, and mixed with molasses for added palatability. This blend is sufficient for lactating dairy cattle, replacement heifers and high-producing lactating dairy goats.

FEEDING DIRECTIONS

Dairy cattle can be fed 9 lbs to 12 lbs of ACE-HI 16% DAIRY FEED twice a day during milking in addition to good-quality alfalfa hay. Amount of grains should be based on size of cow, body conditioning, and pounds of milk being produced. The grain portion should make up about 1% to 1.5% body weight or 1/2 pound of grain for each pound of milk. Make sure cattle have plenty of water since they can drink about 15 gallons each day. A salt block or loose trace mineral salt should also be available at all times.
