

FEATURES

BENEFITS

High-Quality Protein Sources

Needed for building body tissue, skin, hair, muscle, nervous system

High-Quality Vitamins & Minerals

Needed for key metabolic functions: enzyme activity, nerves and electrolytic balance, precursors in building and repairing tissue

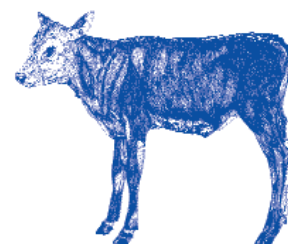

Digestive Enzymes

Aids in the assimilation of nutrients. Provides microbial growth in rumen

NU-CALF MEDICATED MILK REPLACER

609

ACE-HI NU-CALF MEDICATED MILK REPLACER is designed to be fed as the major supplement until the calf is weaned and begins eating hay and grain. It is medicated with Oxytetracycline and Neomycin to promote growth and feed efficiency. Withdraw ACE-HI NU-CALF MEDICATED MILK REPLACER 30 days before butcher.

FEEDING DIRECTIONS

Age	Calves over 80 lbs at Birth	Calves under 80 lbs at Birth
First 3 days	Feed Colostrum	Feed Colostrum
4-32 days old*	2 cups Milk Replacer with 2 quarts warm water FEED TWICE A DAY	1- 1/2 cups Milk Replacer with 1-1/2 quarts warm water FEED TWICE A DAY
33-40 days old or until weaned	2 cups Milk Replacer with 2 quarts warm water FEED ONCE A DAY	1-1/2 cups Milk Replacer with 1-1/2 quarts warm water FEED ONCE A DAY

*After 7 days: Offer the calf fresh water and ACE-HI JUNIOR CALF RATION.

*After 14 days: Hay of high quality may be introduced at the end of the second week, but is not necessary until after weaning.

For bulk mixing: Mix 3/4 lb to 1 lb of ACE-HI NU-CALF MEDICATED MILK REPLACER per gallon of warm water depending on the size of the breed (for calves only).
