

Features	Benefits
High Quality Protein & Energy Sources: Fish Meal Soybean Meal Wheat Flour Fish Oil	Provides critical nutrients for the formation of body tissues such as scales, bones, muscles, and nerves. Supplies energy for optimum growth, performance, and maintenance of Koi & Goldfish
Balanced Vitamins, Minerals and Amino Acids Includes Stabilized Vitamin C and Taurine	Needed for metabolism, skeleton formation, nerves, body fluid regulation, and enzymes. Increased growth potential and immune system.
Extruded Floating Pellet	Improves feed conversion and increases digestibility of feed ingredients and nutrients. Maintains water clarity for the enjoyment of your pond.

Star Milling Co.
KOI & GOLDFISH
POND DIET
 7080
FLOATING PELLETS
Pellet Size: 1/8"

STAR MILLING KOI & GOLDFISH diet is formulated for all stages of growth for the optimum health and performance of Koi and Goldfish in pond environments.

RECOMMENDED FEEDING INSTRUCTIONS

For Maximum Growth – Feed 3 to 4 times per day an amount fish will readily consume in 5 to 15 minutes.

Staple or Maintenance – Feed 2 to 3 times per day an amount fish will readily consume in 5 to 15 minutes.

Water quality, temperature, and activity level of fish will be the factor used in deciding when to feed. Feed at the same time and place each day. For best results, distribute feed in several places where fish do not have far to travel and to allow less aggressive fish access to food. For optimum water quality, remove all unconsumed food after 15 minutes. It is recommended to feed when water temperature is above 41°F (5°C) and fish are active.
