

Diamond Catfish Pellets

(3044)

DIAMOND CATFISH PELLETS are a 32% crude protein ration containing only high quality ingredients and formulated using the latest technology available.

FEEDING DIRECTIONS

Feed at a rate equal to 3 % of the live weight of the fish in the pond, raceway or lake. Once or twice per day feed an amount of feed the fish will clean up. Do not feed more than the fish will eat in 20-30 minutes. Feed at or near the same places each day and at about the same time.

Distribute feed in enough places around the pond, raceway or lake so that fish will not have to travel far to get food. Feed in 5 or 6 places in lakes of 1 to 2 acres and in more stations in larger lakes.
