

## CATFISH PELLETS (8097)

Kelley's Catfish Pellets are a 32% crude protein ration containing only high quality ingredients and formulated using the latest technology available.

**Feeding Directions:** Feed Kelley's Catfish Pellets at a rate equal to 3% of the live weight of the fish in the pond, raceway or lake. Feed Kelley's Catfish Pellets once or twice daily as much as the fish will consume within 20-30 minutes. There should be no excess feed in the water after this time.

Distribute Kelley's Catfish Pellets in enough places around the pond, raceway or lake so that fish do not have to travel far to get the food. Feed in 5 or 6 places in lakes of 1 to 2 acres and in more stations in larger lakes.
