

Diamond Alfalfa Molasses

(3109)

DIAMOND ALFALFA MOLASSES is a coarsely chopped alfalfa hay (with no less than 9% protein) that is sprayed with molasses. It was first developed to be fed to older horses that had a difficult time chewing and digesting their loose hay. In checking the stools of the older horse, it was found that large amounts of the loose hay fed from the bale were passing through the horse's digestive system without being utilized. Feeding the coarsely chopped alfalfa allows the micro-organisms to attack and break down the alfalfa thus allowing the animal to utilize more of the product before it passes through the system.

Alfalfa Molasses is better known as A&M and can be fed to all types of horses regardless of age. Feed it as a treat or supplement the ration with it.

FEEDING DIRECTIONS

Feed at a rate of 1/2 lb to 1 lb per 100 lbs of body weight, depending on the level of activity.

GUARANTEED ANALYSIS

CRUDE PROTEIN	Not Less Than	9.0 %	CRUDE FIBER	Not More Than	23.0 %
CRUDE FAT	Not Less Than	1.0 %	ASH	Not More Than	16.0 %

INGREDIENTS

Suncured Alfalfa, Cane Molasses.

Features:

- ALFALFA
- MOLASSES

Benefits:

- Provides a good source of calcium, fiber & protein
- Increases palatability of feed, adds energy & minerals
