

Diamond 3-Way Scratch (3023)

DIAMOND 3-WAY SCRATCH is a 9% protein feed that can be fed to adult birds, wild ducks, wild birds and other types of waterfowl since they are running free in the yard and are able to scavenge bugs as additional sources of protein.

DIAMOND 3-WAY SCRATCH can also be fed as a supplemental product to broilers.

There are no vitamins or minerals added so an additional source of calcium will need to be added if fed to laying hens. Supplement with oyster shell to meet the laying hens' calcium requirements.

GUARANTEED ANALYSIS
