stabilized rice bran nugget 40 lbs. Net Wt. 18.14 kg

Integrity
stabilized rice bran nugget

Horse owners seeking healthy weight gain or weight maintenance for their horse often turn to a rice bran supplement. Available in meal and nugget, rice bran is high in fat and helps horses add the additional calories for buliding a little more lean muscle.

Integrity Lite and Integrity Rice Bran is the perfect combination to keep my horse energetic and performing his best!
-Shannon Clawson

Integrity Stabilized Rice Bran is a high fat diet that also adds and enhances a healthy skin coat. One of the attributes that makes this feed superior is that it is calcium-phosphorous balanced. That means that when you add it to a balanced feed, the calcium-phosphorus ratio of the feed will not be altered and your horse will still be fed the nutritionally balanced diet you've intended.

Scientific benefits aside, this is just a darn good feed with high quality ingredients like whole ground flaxseed, added Vitamin E, probiotics and prebiotics, to name a few.

Integrity products offer balanced feeds for *all* types of horses, such as Adult/Senior, Growth, Lite, Performance, Mare & Foal, Low Starch and more. Their horse feeds are available in feed stores throughout California and Arizona.

Integrity feeds are sold at [feed stores near you.](#)
